When Do I Delete Catalogs?

It is recommended that you do not delete a Manufacturer Catalog UNTIL:

You have completed the Design Projects (2020 Designs (Kit Files)) using that catalog.
OR
You have "Switched" your Design Files using the catalog to a newer version of the catalog. (See "Switch Items" PDF in the Help Files List.)

Prior to Deleting a Catalog, you might consider creating a backup copy of the Catalog and placing it in a Archive Folder on your hard drive or burn it to a CD in case you need it for some reason in the future.

Deleting a catalog can be achieved by accessing "Catalog Tools" from the 2020 Shortcut Bar and then select "Delete a Catalog" and follow the dialog. It is very simple and does request confirmation prior to the function deletes the catalog. Once a catalog is deleted…there is no undo. It is gone!
